RETETA

Empowering Clinicians and Transforming Healthcare with Explainable AI

AI Voice Assistance

Reteta is an explainable AI app that bolts onto any EHR for automating clinical scribing through ambient voice capture & extracting SOAP notes from raw patient-clinicians conversations, while giving real-time visibility into reimbursement codes.

| Generate SOAP notes | After-visit summaries | improve medical coding accuracy | Boost revenue cycle management |

62% of clinicians reporting burnout from excessive documentation

Reduces manual processes

Improves accuracy

Enhance clinician-patient interaction

Reteta restores the joy of practicing medicine while minimizing documentation errors and reducing claim denials.

Our Solution:

With Reteta Scribe, clinicians can automatically capture and structure patient-clinician conversations, producing detailed SOAP notes & medical codes, after-visit summaries, and referral letters.
By freeing up an average of two hours per day per clinician, Reteta Skribe reduces the documentation burden and provides visibility into medical codes in real-time. These codes are a critical piece of information that can help providers to optimize reimbursement for the complete services rendered.

Reteta's ability to assist clinicians to correct the potential documentation gaps that would lead to claim denials is reducing the CDI cycle from days to minutes. Our solution offers

Structured SOAP notes, patient summaries and referral letters tailored to various specialities

Evidence mapping to transcription and audio files

Note customization for each clinician's preferred format

Increase accuracy with medical coding automation

Real-time clinical documentation improvement (CDI) suggestions to reduce documentation gaps and down

Overcome medical coding bottlenecks with the **speed of AI**

Explainable AI

Our AI solutions are fully transparent, providing healthcare professionals full visibility into decision-making, ensuring complete control over clinical and administrative outcomes.

Real-time scribing

Reteta captures patient-physician interactions in real-time, converting them into structured clinical notes, auto SOAP notes and after-visit summaries, saving a clinician up to 2 hours per day.

Medical coding enhancement

Reteta Bcoder improves coding accuracy with real-time coding suggestions and automatic application of ICD-10-CM and CPT codes, ensuring compliance and reducing claim denials.clinical and administrative outcomes.

Improved clinical decision-making

Reteta offers predictive assessments and pre-charts comprehensive insights, enabling faster, more informed decision-making before patient visits..

HIPAA-compliant and secure

Reteta ensures security with end-to-end encryption and HIPAA-compliant data management, safeguarding sensitive patient information and ensuring peace of mind.

Why choose **Reteta?**

Healthcare providers face mounting pressure to deliver high-quality care while managing the increasing burden of administrative tasks. Reteta addresses these challenges by providing a comprehensive, AI-powered solution that automates the most time-consuming parts of clinical documentation and coding. Here's why healthcare providers trust Reteta:

Reduce clinician burnout
Reteta reduces clinician burnout by up to 50% and boosts job satisfaction by automating tedious tasks.

Increase productivity
Reteta automates documentation, saving clinicians up to 2 hours daily and helping medical coders complete tasks in 1/5th of the usual time.

Improve revenue cycle efficiency
By automating coding and reducing errors, Reteta helps healthcare providers save up to millions per year through accurate claim submissions.

Enhance patient outcomes
Reteta improves outcomes by enhancing documentation and freeing clinicians to focus on patient care instead of administrative tasks.

Explainable and secure AI
Our solutions are HIPAA-compliant, ensuring the highest levels of security for sensitive patient information.

Get in touch with **Reteta**

Our AI-powered platform is already making a difference in healthcare facilities, and it can do the same for you. Schedule a demo or consultation to see how we can help streamline your documentation and coding processes.
